CLIP FOR COUPLING WINDSHIELD TRIM TO A VEHICLE

ABSTRACT OF THE DISCLOSURE

A clip for securing trim to a body. A first portion of the clip has a first side configured to be mated against a surface of the body and a second, opposing side configured to mate with the trim. The second side has a device for securely coupling to the trim. A second portion of the clip is configured to be attached to the body. The second portion is disposed within a channel in the first portion. The first portion is slidable relative to the second portion along a first axis. The first portion may be moved relative to the second portion to permit adjustment of a position on the body of trim coupled to the first portion.
